

PROCEDURE FOR SD CARD FORMATTING.

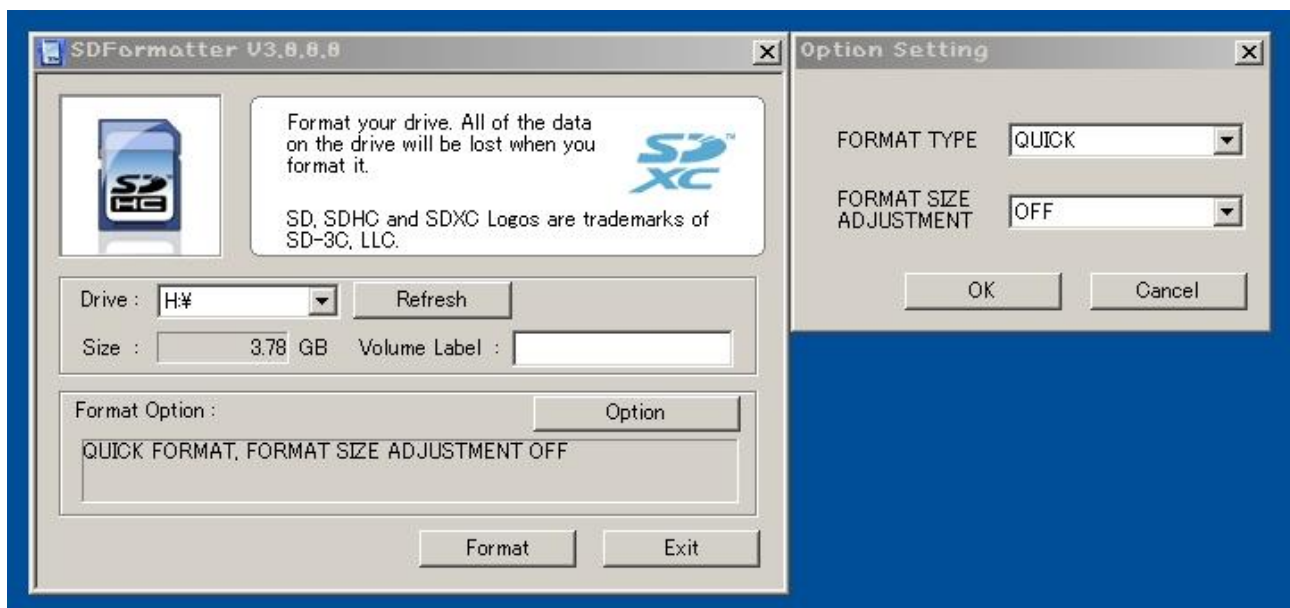

We recommend perform the SD card formatting if you have the following problem:

- a) Rebooting of unit automatically
- b) Broken image of the recorded files

- 1) Download the SD card formatter program from www.BlackVue.com.sg/support
- 2) Once you unzip it, you will see the folder like No.2.
- 3) Open the No.2 and install the **setup.exe**.
- 4) After installing, **SD Formatter** will be displayed on your desktop.

5) Instruction

• SD Formatter Option

- Format Type

- a. Quick : Select this to fix a simple error
- b. Full(Erase) : Full format & Initializing file system
- c. Full(OverWrite) : Full format & Initializing whole flash memory

- **Format Size Adjustment** : If there are capacity problems, it makes to recognize capacity well.

6. We recommend to select **c. Full(OverWrite) : Full format & Initializing whole flash memory.**
