<	Create account
	E-mail
	Password
	Re-enter password
	Letter account

D) Read and accept the Terms Of App Service and Privacy Policy by clicking on the check box and clicking on the Terms Of Service Icon.

E) An email will be send to your registered email address. Press do follow the instruction on your email to confirm your registration.

# **Registering Camera to cloud**

By registering BlackVue installed in your car to the login account, you can view camera videos and receive event notifications.

- 1. Run the App and select **BLACKVUE CLOUD**.
- 2. Select -> Register new camera -> QR code.
- 3. When the video recording screen appears, ensure that the QR code attached on the mount is visible.
- 4. When the QR code is read, press Registration.

'QR Code' is a registered trademark of Denso Wave Incorporated.

#### Note

- You can register the camera by photographing the QR code or typing the product serial number and the Cloud security code.
- If you cannot find or lost the QR code, please refer to "BlackVue Over The Cloud Compatibility For BlackVue DR650GW Series".
- Before you can use BLACKVUE CLOUD, you must connect BlackVue to a mobile hotspot.

# How to connect your BlackVue to a hotspot?

In order to enjoy BlackVue Over the Cloud, you must set up your BlackVue to connect to a Wi-Fi hotspot. This hotspot can be your home Wi-Fi, a mobile Wi-Fi hotspot or your car's embedded connection. Once you are done, you will be able use your BlackVue Over the Cloud account to connect to your BlackVue from anywhere, anytime.

1. With your BlackVue on and your hotspot in range, go to BLACKVUE WIFI. On iOS: connect through your device's Settings/Wi-Fi menu, then skip steps 2 and 3.

2. Select your BlackVue from the list of available devices.

# **3.** Enter the BlackVue's password (by default: blackvue).

Select BlackVue							
DR650GW-F04CDF							
BlackVue Wi-Fi login							
SSID	DR650GW-F04CDF						
Password	password						
C	K Cancel						
DR650GW-F00FB1							
DR650GW-F04D6C							
DR650GW-F							

4. Once logged in, tap the "..." icon in the top right corner and go to Camera settings

### **5.** Select Firmware settings.

#### **6.** Select Cloud settings.

### **7.** Select Cloud service hotspot settings.

8. Select your hotspot from the list and enter its password, then tap OK.

Oloud settings							
	Choose a Wi-Fi network						
	SSID	FREE	_U+zone				
	Password						
	Show password			ণ্ড			
	earzone_off						
	PS_Lab1						
	FREE_U+zone						
	U+zone						
	A-TRUE						
	ОК		Cancel				

#### **9.** Make sure to select QUIT AFTER SAVING.

**10.** Camera will now reboot.

**11.** Camera will prompt "Cloud Access On" and wifi led will start blinking when BlackVue is connected to cloud services)
